

RENE VARTANIAN

Dear Hiring Team,

I am writing to express my interest in the Front-End developer position in your team.

I am a recent high school graduate. I have actively utilized React, Redux, React Router DOM, APIs, and data sources to develop front-end projects, such as weather forecast application UI, utilizing text-to-speech technology.

Furthermore, with my passion for automation, I develop tools to help with my daily tasks, such as a language-learning companion app. My recent project was creating a portfolio website, using responsive elements and animations.

My life experiences such as volunteering to teach JavaScript and Python languages, have helped to fill in my knowledge gaps and improve my problem-solving and logical thinking skills.

I am interested in contributing to your team because of the nature of the work and your interactions with JavaScript, React, styling, and APIs. Getting experienced in web development, especially for someone like me who is passionate in those fields, can be an inspiring experience for me.

I truly believe your organization would also benefit from having me as a hardworking individual passionate about learning new things.

I am eager to discuss how my excitement and skills would align with your goals and would appreciate it if you consider my application.

Best Regards,
Rene Vartanian

Trainings & Certificates

React beginner and advanced courses – Scrimba - 2024

After completing 26 hours of React courses on Scrimba, I've mastered essentials like React Router DOM, hooks, and context API, learned how to deal with sad path scenarios and increase performance quality. In this journey I also learned Tailwind and Redux from other courses.

JavaScript courses -2020-2024

Self-learned JavaScript from various courses provided by Internet such as FreeCodeCamp. I gain knowledge in fundamentals, data structures, ES6, asynchronous programming and more.

Python and Django framework - Armenian Code Academy - 2023

I took a course at Armenian code academy to enhance my python skills furthermore for further advancement I proceeded with my learning process in the Django framework

Technical and fundamental analysis – 2020-2022

These skills which I also achieved from online courses help me visualize trading parents more accurately in cryptocurrency trading

Experiences

2024

Upwork (freelance developing)

Bug Fixing

My job in the projects I had was mainly to fix bugs in website user interfaces.

2022-2023

Shahid Fahmideh School

Volunteer Python Teacher

In my last year of education, I volunteered to teach Python to the 8th-grade students in the school. My syllabus included basic Python concepts, homework, and Turtle Design.

2021-2022

Startup RJ98 NFT Organization

NFT Marketing

In our small team of non-fungible token sales, I was responsible for marketing our plans and interacting with customers and other startups for collaborations. In this journey, I gained knowledge in content marketing and affiliate marketing.

2020-2022

Freelancing

Cryptocurrency Trading

As someone with a modest proficiency in technical and fundamental analysis, I engaged in freelance Cryptocurrency futures trading.

2019 – 2020

Jelve Studio

Support Department

I worked in Jelve Studio's support department, fixing software and physical issues while assisting co-workers in their tasks.
